

 Standard Pallet Rack Depth 

8" x 3" channel for illustration, fabricator should size to fork tine sizes in use

As illustrated, one rack has capacity of up to 1,600 ft of 1" bar or tube

Tolerance is recommended, keep the things under 2' wide so they fit as shown to keep the density high

-  Pass through
-  Optional side forklift cutouts
-  Steel/Aluminum

****Not to scale****

Measurements $\pm 0.10"$

High density for materials, round bar, tube, etc.
Designed to be 4x per pallet rack shelf
